FORTINET
REAL TIME NETWORK PROTECTION

Less confusion about licensing, threat protection, configuration and web filtering.
Hardware that controls your internal network **without compromise**.

FortiGate appliances provide cost-effective, comprehensive protection against network, content, and application-level threats - including complex attacks favoured by cybercriminals - without degrading network availability and uptime.

Protection for your network:

Built-in anti-virus, anti-spyware and anti-spam

Complete control:

Graphic interface, Quality of Service & one license covers all technology

Streaming media:

Allow and disallow media streaming at the press of a button

Daily updates:

Automated downloads keep your threat database up-to-date

Download control:

Choose who can download content and the type of files allowed

Automated Scheduling:

Schedule times for users and computers to gain access

Bandwidth usage:

Check bandwidth resources, cap usage and cut over-usage costs

Detailed Reports:

Find out who is accessing resources and from which computer

Industry backed support:

Technical support available from NDB and Fortinet
